

Abstract of the Disclosure

An embodiment of the present invention is a method for transmitting a work to a client which includes steps of: (a) saving at least a portion of the work for a first period of time; (b) receiving a request for the work from the client; (c) transmitting a time-scale modified version of the saved portion of the work for a second period of time, wherein the second period of time is substantially equal to a time it takes for the time-scale modified version to synchronize with the work, had the work been transmitted from a start of the first period; and (d) transmitting the work starting at the synchronized point.
